

NOTICE

TO: Licensed medical cannabis growers, processors, dispensaries, and ancillary businesses
RE: OneStop Drug Screen Requirement Elimination
Date: October 14, 2022

The Maryland Medical Cannabis Commission (the “Commission”) is providing this notice to update all licensed medical cannabis businesses on changes to the agent registration drug screen requirement. Consistent with the changes to the medical cannabis program approved by the Commission at its meeting on September 22, 2022, the drug screen requirement for prospective agents will be eliminated effective Monday, October 17, 2022.

Although this change will be in effect beginning October 17, the OneStop system will still display the required drug screening upload field for agent applications for a short period beyond the October 17 effective date in order to technically implement this change within the OneStop system. The Commission advises businesses to upload a blank document into the required field for the drug screening until the system fully reflects the approved change for prospective agents.
